## OBJECTIVE: SOFTWARE DEVELOPER

I am an experienced Java Developer with more than 20-years of progressive experience in the IT, Telecommunication and Bank industry. I was involved in complete SDLC and CI/CD, including analysis, design, development, testing, and implementation. For the last 6-years, most of my projects have been based on a movement from Monolith to Microservice. As a result, I built a deep knowledge of designing and developing a distributive system in a full-stack environment. In addition, I actively seek new technologies and stay up to date on industry trends and advancements. This allows me to deliver extraordinary work to all of my employers, including if I work on a project basis.

## WORK EXPERIENCE

### Lead Developer / Architect

Jun 2022 – present

AXINOS Inc, East Gwillimbury, ON, Canada

- Designed and implemented **Event-Driven Developments** and strongly optimized microservice environments established with **Spring Boot, Kafka** and **MongoDB**.
- **Guided** and trained team members in **coding techniques** and industry standards.
- Initiated well-detailed project road maps, plans, schedules, and work breakdown structures alongside Agile development methodology.

### Senior Java Developer

Jan 2022 – May 2022

IDENTOS Inc, Toronto, ON, Canada

- Performed **Java coding and unit testing** following design patterns and clean code.
- Developed **new features** for existing systems.
- Peer reviewed code and debugged errors to improve application performance.
- Used **Java 17, Spring Boot** frameworks and **MySQL**.
- Tracked tasks by Jira and worked under Scrum methodology.

### Software Developer

May 2021 – Sep 2021

AMG Environmental Inc, Barrie, ON, Canada

- Performed **NodeJS** and **React** coding and unit testing.
- Designed and developed new modules for existing systems.
- **Peer reviewed** code and debugged errors to **improve application performance**.
- Used NodeJS, Express, and PostgreSQL to build the backend and React and Redux to build the frontend.

### Lead Java Developer / System Architect

Dec 2018 – May 2021

Plandesk Ltd, Winchester, United Kingdom

- Responsible was to designing and developing an integration between the Bank systems and the Dept Manager at **Erste Bank Hungary**. Built some new necessary features and replaced some existing monolithic backend systems.
- As an Architect, coordinated a developer team to **increase qualified sprint releases** at a Bank/Financial field and reduced the product release time from 8 months to 1-1.5 months.
- Design and implement a **strongly optimized** solution to replace the existing outdated monolith system with a Spring Boot microservice environment.

### Senior Java Developer (VP)

Sep 2018 – Dec 2018

J.P. Morgan Chase & Co., Glasgow, United Kingdom

(289)547-8916

ATTILA ORMAI

attila.ormai@gmail.com

- **Maintained the performance** of the existing ETL system and designed a stable test environment. Collaborated with multiple departments of Asset & Wealth management to achieve a trustworthy solution.

**Senior Java Developer**

Oct 2014 – Sep 2018

Plandesk Ltd, Winchester, United Kingdom

- Created **cost effective test-driven architecture** implementations on microservice environment and aggregated for internal audits and reviews of security activities.
- **Optimized** the data store layers to **increase** the mail handling a day up to **200%**.
- Developed and supported all phases of IT project life cycle including requirements and design patterns.

**Lead Developer, CTO, Co-owner**

Jun 2007 – Oct 2014

Netfone Kft, Budapest, Hungary

- Founder member of the first Hungarian Mobile Virtual Service Provider. **Responsible** for designing and developing an ERP/CRM platform. **Managed a 10 members of Java developer** team using agile methodology.
- Designed and implemented an Internet Provider ERP System, resulting in the firm **revenue** could **grow** from \$3M to 10M for the next two years, due to the system being allowed to increase and handle the customer number rapidly.

**MAIN QUALIFICATIONS**

- Intrinsically motivated to learn new technologies continuously.
- 20+ years of industry experience delivering cost-effective, quality software on time.
- Communicative team player with the ability to mentor and guide others in achieving goals.
- Experienced in leading teams to design and implement complex software solutions.
- **Programming Languages:** Java (15+ years), Spring Boot (5+ years), JavaScript (ES6/7/8)
- **Message brokers:** Kafka, RabbitMQ, Apache Qpid
- **Project Methodology:** Agile (Scrum, Kanban), Waterfall, Jira, Confluence
- **Methodology:** SDLC, SOLID principles, clean-code, TDD, DDD, BDD
- **Environments:** Maven, Git and GitHub, ELK, Linux/Unix, MacOS, Windows

**EDUCATION**

**Computer Programmer (Co-op) Program**

Sept. 2020 – Sept. 2022

Georgian College, Barrie, ON

**Key Courses:** Advanced Java Development, System Development, Design Data-Driven Systems, Information Architecture, Client-Side and Server-Side Scripting, Internet of Things, Mobile Development

**Bachelor of Computer Science (partial)**

May. 2018 – Sept. 2019

The Open University, Online, United Kingdom

**High School Certificate of Software Design and Development**

Sept. 1993 – July. 1997

Sepal Technical High School, Budapest, Hungary

**CERTIFICATIONS/ACHIEVEMENTS**

- **MongoDB Basic and Aggregation Framework.** MongoDB University Marc 2018
- **Agile methodologies training.** Training360. Hungary May 2016
